THE STORY

A Radford University Fashion Merchandising and Design alumna with a minor in Metals and Studio Art, owner and designer Brittanny DeRaffele designed her first full collection in 2013 with a vision of classic goddesses and their unique stories, designed for modern day. The idea of ancient civilizations crafting pieces out of metal and gemstones for adornment, long before the conveniences of modern tools, had always fascinated and inspired her design process.

Texas born by way of my parents from the Caribbean, she always finds herself feeling that pull to the ocean and sun with all of it's magic and inspiration. The constant influence of the glowing energies of our sun and moon, with the added universal connection of astrology and how it manifests in each of our lives, continues to flow through her creative process. SELENE, the goddess and ancient personification of the moon, was the muse for the first ring in the collection that started this journey and sparked the evolution of the current line. In January 2017, a full renaissance of the brand was then complete and SUN & SELENE was born.
